

YIELD ENHANCER / FERTILIZER / PGPR

Brand Name : Booster
Group Name : High Power Minerals

Tech. Name : Bio Stimulant

Application : BOOSTER is an Eco-friendly Nanotechnology Research Based Granules for maximum and better yields. Being an organic compound Booster has best characteristics as a fertilizer. It stimulates root formulation, increase root respiration and root growth, especially vertically enable and better uptake of minerals, with stands stress and drought conditions and increase water holding capacity. Increase tillers in paddy an sugarcane and it stimulates the secretion of necessary for plant growth which enhances yields.

Crops : Paddy, Sugarcane, Wheat, Banana, Potato, Onion, Soyabean, Chillies, Cotton, Pulses, Vegetables, Fruits and other all crops.

Doses Recommended :

Dosage : Soil Application 2kg per acre.
 (Note: maintain adequate moisture for 7 days before and after application).

Pkg. Sizes	10kg
Pcs/Box	10 x 1
Total Qty.	10Kg. (Bucket)

Packing Material : Bucket Bottle/Cans
